Product Line Card

Sustainable Cleaning Products

Water/Wastewater Treatment

- **Powder in a Bag in a Box (PBB)** products eliminate drum handling and reduce freight, labor and disposal costs. They also reduce safety hazards and storage space concerns.
- **Modu-Light™** is ultraviolet technology which can eliminate the need for biocides, making it the most eco-conscious choice.
- **Modular Solutions** is our total systems approach that ensures a lean and efficient water treatment program.
- **EPP certified and LEED point** products to help make your facilities and processes environmentally friendly.
- **Wastewater Treatment** products ensure that what you are releasing into the environment meets discharge requirements.

Metal Coating and Pretreatment

- **Phosphate-Free Pretreatment** uses our Zirconization process which is a cost effective and high performance alternative to phosphate.
- **SurSolv** is a low temperature cleaning additive that contains no VOC, no SARA reportables and reduces waste discharge and water consumption.
- **Multi-TERJ®** metal cleaning products provide low temperature operation, reducing energy. They also increase worker safety by eliminating high pH detergents and lower maintenance costs by eliminating scale.

Metalworking Fluids, Oils and Greases

- **Step One** lubricants eliminate downtime by cleaning while your equipment works. It contains no solvents, helps reduce parts replacement and is cost effective as it is only used at 5-10% dilution.
- **Polymer-Fortified** lubricants lower temperatures, extend oil and grease life and reduce amperage and leakage.
- **Lubricoolant®** brand metalworking fluids can be dispersed on-demand with DuMeter, ensuring a lean operation.

Maintenance, Vehicle and Equipment Cleaning

- **DuJel** versatile cleaning products have clinging action that save you money on labor by increasing cleaning turnaround, reducing rinse requirements and reducing production and equipment downtime.
- **DuMeter** equipment minimizes waste by controlling chemical dispersement, allowing you to only pay for what you use.

Paper Chemicals

- **Altrox™** cleaning products contain no chlorine and have less than 1% VOC. They save time and money and eliminate discharge problems.
- **Vari-Clean™** systems eliminate waste by using an automated, touch screen controlled system, reducing totes of chemicals shipped by 60-80%.

DuBois wants to be your partner in sustainability by offering innovative solutions that reduce costs in these areas:

Energy Reduction Technologies

- Reduce operating temperatures required for cleaning and pretreatment
- Reduce cleaning time
- Reduce storage and warehouse footprint

Water Reduction Technologies

- Improve metal cleaning and pretreatment bath life
- Improve intervals between boiler blowdowns
- Reduce water makeup requirements
- Reduce rinse requirements

Labor Reduction Technologies

- Improve ease and time of application
- Reduce requirements for reapplication
- Improve cleaning turnaround time
- Improve time between operations and required maintenance
