DuMETER System For Metalworking Fluids

- 12 gpm solution
- Adjustable concentration ratios
- Secure locked system
- Pay-as-you-go saves money

DuMETER System For Metalworking Fluids

Real Simple, Real Effective

The DuMETER System provides concentration and cost control because the price is calculated based upon the mix ratio used.

The pay-as-you-go concept saves you money by:

- Eliminating wasted chemicals
- Eliminating cash tied up in inventory of metalworking fluids

Concentration Control

Proper mix ratios ensure optimal fluid performance leading to longer sump and tool life.

With the DuMETER System concentrations are set and secured under lock and key. Your DuBois representative works with you to determine the correct mix and services the system monthly.

Not only do you pay-as-you-go but you eliminate the bucket brigade. Poor concentration control means poor cost control.

DuBois Lubricoolants®

The DuMETER System for Metalworking Fluids is designed for use with DuBois Lubricoolant brand cutting and pressworking fluids.

DuBois Lubricoolants provide outstanding tool and sump life.
