

**For Immediate Release**

**DuBois to present at National Environmental Partnership Summit**

SHARONVILLE, Ohio – (May 15, 2008) – DuBois will be participating at the **National Environmental Partnership Summit**, held May 19-22, 2008 in Baltimore, Maryland at the Sheraton Baltimore City Center Hotel.

Bruce Dunham, Director of Innovation at DuBois, will be presenting as part of the Next Generation Conversion Coatings session, which is being held on Wednesday May 21.

The Environmental Partnership Summit is an interdisciplinary gathering of environmental professionals and assistance providers from diverse sectors all over the country and world. It was created five years ago with the merger of the annual meetings of the National Pollution Prevention Roundtable (NPPR), the Compliance Assistance Providers' Forum and the Performance Track Participants Association (PTPA). For more information on the Environmental Partnership Summit, please see their website: [www.environmentalsummit.org](http://www.environmentalsummit.org).

DuBois is committed to providing customers with lean manufacturing and sustainable, green initiatives to support the needs of their businesses. In order to achieve that goal, DuBois emphasizes a total cost of ownership or TCO approach in their work. DuBois provides water/wastewater treatment, surface finishing/paint pretreatment, maintenance cleaning and specialty product solutions.

DuBois Chemicals is the industrial division of JohnsonDiversey Inc., a leading global provider of cleaning and hygiene solutions. DuBois is a leading specialty chemical provider dedicated to offering best in class customer solutions for safe, healthy and high performing facilities.
