

**DuBois**

**Modular Solutions  
for Cooling Water Treatment**

# The true cost of water treatment

The cost of chemicals is minimal compared to the impact that a good water treatment program can have on energy, water, and labor costs.

## DuBois Modular Solutions

A truly sustainable way to address these key customer issues

- Controlling use-costs without jeopardizing results
- Minimizing shipping, storage, and labor involved in chemical handling
- Minimizing the environmental impact
- Contributing to LEED points for new and existing buildings
- Automating the control and monitoring of feed, cycles, and results
- Minimizing water consumption
- Minimizing energy costs through improved efficiencies

## Modular Solutions key components

	Makeup Module	Scale/Corrosion Control Module	Filtration Module	Bio-Control Module	Feed/Control/Monitoring Module
Total Systems Approach	•	•	•	•	•
Water Savings	•	•			•
Efficiency Improvement/Energy Savings		•	•	•	•
Eliminate Acid Feed	•	•			•
Minimize Corrosion		•	•	•	•
Extreme Temp/Hardness Stability	•	•			•
Minimize Chemical Level	•		•	•	•
Minimize Environmental Impact	•	•	•	•	•
Improve Handling Safety	•	•		•	
Minimize Labor		•			•
Minimize Bleed	•	•	•		•
Minimize System Cleaning	•	•	•	•	•
Minimize Risk of Disease - LDB		•	•	•	•

# Modular Solutions

## for controlling corrosion, deposition, and biofouling

Through the selection of the correct **Modular Solutions**, these issues are successfully addressed by you and your DuBois team. Your final product is a program designed to give you the results you require, in turnkey fashion. Nothing less!

Control algal and bacterial biofilm. Minimize the risk of disease, and do it with environmental care!

Make scale and solids deposition a thing of the past through combined dispersant control technologies!

Minimize corrosion through proven, low impact chemistry and mechanical solids control!
