**DuBois**

**EZ Cool II PBB**

**Drum-free water treatment  
for all your comfort cooling needs**

# Why EZ Cool II PBB?

EZ Cool II PBB, or **P**owder in a **B**ag in a **B**ox, combines safety, simplicity, and sustainability to provide complete protection for your cooling water treatment needs.

## Safety

We developed EZ Cool II PBB to eliminate drum handling, and improve worker safety. As a powder, it is easy to ship, store, and move. Cleanup is as simple as sweeping it up with a broom.

## Simplicity

One 12-pound carton replaces 300 pounds of traditional liquid chemistry. Following the addition of GAX-16 bacteriostat to the EZ Cool II blend, one pump provides all treatment, including bio-control. Finally, because of the small size of the makedown system, it is ideal for tight, cramped areas.

## Sustainability

- Reduced shipping costs
- No drum handling or disposal costs
- Lower maintenance costs
- Small storage space requirement
- Minimized biocide addition and impact (especially when coupled with our Modu-Light™ UV bio-control unit)

## Technically Speaking

EZ Cool II PBB is made to handle cycled system water within a range of 150 - 800 ppm hardness and 200 - 400 ppm M-alkalinity. As a blend with biocide, it provides scale and corrosion protection as well as bio-control, including algae and slime.

## Make the EZ Decision

EZ Cool II PBB does it all! You can lower your costs, so why not make the switch today?

# EZ To Use

EZ Cool II PBB is packaged in a small box that can be shipped by UPS or FedEx. No more drums!

Just empty the pouch into the compact makedown system, and toss the bag in the trash. Recycle the cardboard box.

System control is a snap. Just dip and read.

The DuBois logo, featuring the word 'DuBois' in a bold, serif font with a stylized wave graphic above the 'i'.
